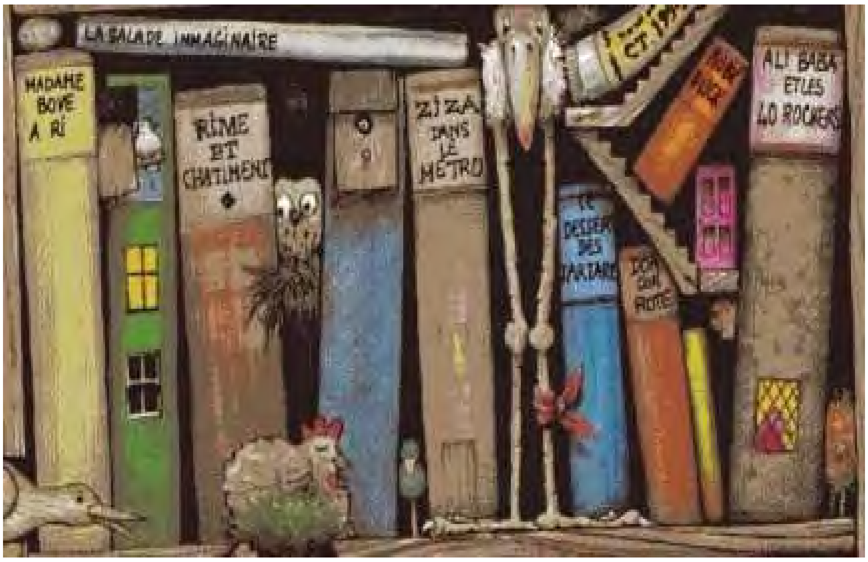
BULLETIN DES SOMMAIRES DES PERIODIQUES SCIENTIFIQUES



Novembre/Décembre 2017

Avis aux Lecteurs

Le présent bulletin des sommaires concerne le sommaire des périodiques reçus au Service de Documentation de l'INRA.

La consultation du sommaire des périodiques est rendue facile grâce à la liste alphabétique des titres des périodiques ci-jointe. Cette liste renvoie aux pages des sommaires dans ce bulletin, ainsi les articles qui vous intéressent peuvent être commandés auprès du service en respectant de mentionner les données suivantes :

- Le titre du périodique ;
- Le volume et le numéro du périodique ;
- La cote de rangement du périodique ;
- Le titre de l'article et la page où est située l'article ;
- Le numéro du bulletin des sommaires ;

Ex : bulletin des sommaires du mois de ……

Sommaire

TABLE OF CONTENTS

Editorial: Biometrics, JABES and the International Biometric Society 723

BIOMETRIC METHODOLOGY

DISCUSSION PAPER

A Risk-Based Measure of Time-Varying Prognostic Discrimination for Survival Models. . . . . *C.J. Liang and P.J. Heagerty* 725

Discussion of "A Risk-Based Measure of Time-Varying Prognostic Discrimination for Survival Models," by C. Jason Liang and Patrick J. Heagerty . . . . . *H. Michael and L. Tian* 735

Discussion of "A Risk-Based Measure of Time-Varying Prognostic Discrimination for Survival Models," by C. Jason Liang and Patrick J. Heagerty . . . . . *T.A. Gerds and M. Schumacher* 739

Discussion of "A Risk-Based Measure of Time-Varying Prognostic Discrimination for Survival Models," by C. Jason Liang and Patrick J. Heagerty . . . . . *L. Parast and C.M. Rutter* 742

Rejoinder to Discussions on: A Risk-Based Measure of Time-Varying Prognostic Discrimination for Survival Models. . . . . *C.J. Liang and P.J. Heagerty* 745

A Space-Time Skew-*t* Model for Threshold Exceedances . . . . . *S.A. Morris, B.J. Reich, E. Thibaud, and D. Cooley* 749

Modeling Nonstationarity in Space and Time . . . . . *L. Shand and B. Li* 759

On Joint Estimation of Gaussian Graphical Models for Spatial and Temporal Data . . . . . *Z. Lin, T. Wang, C. Yang, and H. Zhao* 769

Hypothesis Testing of Matrix Graph Model with Application to Brain Connectivity Analysis . . . . . *Y. Xia and L. Li* 780

A Dirichlet-Tree Multinomial Regression Model for Associating Dietary Nutrients with Gut Microorganisms . . . . . *T. Wang and H. Zhao* 792

Parametric Functional Principal Component Analysis . . . . . *P. Sang, L. Wang, and J. Cao* 802

Statistical Significance for Hierarchical Clustering . . . . . *P.K. Kimes, Y. Liu, D.N. Hayes, and J.S. Marron* 811

Pearson's Chi-Square Test and Rank Correlation Inferences for Clustered Data. . . . . *J.H. Shih and M.P. Fay* 822

Proportional Hazards Model with a Change Point for Clustered Event Data . . . . . *Y. Deng, D. Zeng, J. Zhao, and J. Cai* 835

Selection of Effects in Cox Frailty Models by Regularization Methods . . . . . *A. Groll, T. Hastie, and G. Tutz* 846

Semiparametric Regression Analysis of Interval-Censored Competing Risks Data . . . . . *L. Mao, D.-Y. Lin, and D. Zeng* 857

On Estimation of Time-Dependent Attributable Fraction from Population-Based Case-Control Studies . . . . . *W. Zhao, Y.Q. Chen, and L. Hsu* 866

Sequence Robust Association Test for Familial Data . . . . . *W. Dai, M. Yang, C. Wang, and T. Cai* 876

Estimation of the Relatedness Coefficients from Biallelic Markers, Application in Plant Mating Designs . . . . . *F. Laporte, A. Charcosset, and T. Mary-Huard* 885

Conditional Estimation in Two-Stage Adaptive Designs . . . . . *P. Broberg and F. Miller* 895

Bayesian Response-Adaptive Designs for Basket Trials. . . . . *S. Ventz, W.T. Barry, G. Parmigiani, and L. Trippa* 905

Maximin Optimal Designs for Cluster Randomized Trials . . . . . *S. Wu, W.K. Wong, and C.M. Crespi* 916

Optimum Designs for Non-Linear Mixed Effects Models in the Presence of Covariates . . . . . *B. Bogacka, M.A.H.M. Latif, S.G. Gilmour, and K. Youdim* 927

A Penalized Framework for Distributed Lag Non-Linear Models . . . . . *A. Gasparrini, F. Scheipl, B. Armstrong, and M.G. Kenward* 938

Estimating Varying Coefficients for Partial Differential Equation Models . . . . . *X. Zhang, J. Cao, and R.J. Carroll* 949

A Generalized Levene's Scale Test for Variance Heterogeneity in the Presence of Sample Correlation and Group Uncertainty . . . . . *D. Soave and L. Sun* 960

Order-Restricted Inference for Means with Missing Values . . . . . *H. Wang and P.-S. Zhong* 972

BIOMETRIC PRACTICE

Direct Estimation for Adaptive Treatment Length Policies: Methods and Application to Evaluating the Effect of Delayed PEG Insertion . . . . . *X. Lu and B.A. Johnson* 981

Combining Item Response Theory with Multiple Imputation to Equate Health Assessment Questionnaires . . . . . *C. Gu and R. Gutman* 990

A Multi-Dimensional Functional Principal Components Analysis of EEG Data. . . . . *K. Hasenstab, A. Scheffler, D. Telesca, C.A. Sugar, S. Jeste, C. DiStefano, and D. Şentürk* 999

Estimation and Testing Problems in Auditory Neuroscience via Clusteringh . . . . . *Y. Hwang, S. Wright, and B.M. Hanlon* 1010

Bayesian Genome- and Epigenome-Wide Association Studies with Gene Level Dependence . . . . . *E.F. Lock and D.B. Dunson* 1018

Visualizations for Genetic Assignment Analyses using the Saddlepoint Approximation Method. . . . . *L.F. McMillan and R.M. Fewster* 1029

Improving Efficiency of Parameter Estimation in Case-Cohort Studies with Multivariate Failure Time Data . . . . . *Y. Yan, H. Zhou, and J. Cai* 1042

CORRECTION

Correction to "Nonparametric Analysis of Competing Risks Data with Event Category Missing at Random," by Natalia Gouskova, Feng-Chang Lin, and Jason Fine; 73, 104–113, March 2017 1053

Grain
ARTICLE

Z. Akter, N.Z. Lupwayi, and P.M. Balasubramanian **610–619** Nitrogen use efficiency of irrigated dry bean (*Phaseolus vulgaris* L.) genotypes in southern Alberta

Molecular Biology
ARTICLES

X. Li, Y. Gao, Q. Jian, Z. Zhang, S. Liu, F. Chen, and J. Zhang **569–579** Ferric reduction oxidase 2 gene from *Pyrus betulifolia* Bunge is regulated by iron deficiency and auxin

L. Li, Q. Wang, R. Deng, S. Zhang, and Y. Lu **580–593** Transcriptome profiling of blue leaf coloration in *Selaginella uncinata* (Desv. ex Poir.)

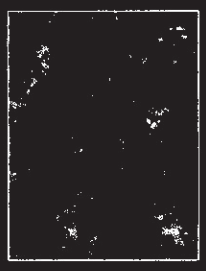
J. Hou, Z. Guo, H. Liu, and T. Yin **594–600** Gender effects on *Salix suchowensis* Cheng ex Zhu. growth and wood properties as revealed by a full-sib pedigree

C. Li, C. Zhang, T. Rong, Y. Lu, J. Wang, H. Lan, and M. Cao **665–673** Insight into the maize CMS-associated mitochondrial–nuclear interaction at the DNA methylation level

M.-L. Yang, J.-J. Ding, H.-Y. Li, M.-N. Sui, and J.-A. Wang **674–683** Identification of QTL underlying soybean agglutinin content in soybean seeds and analysis for epistatic effects among multiple genetic backgrounds and environments

Z. Coleman, J. Boelter, K. Espinosa, A.S. Goggi, R.G. Palmer, and D. Sandhu **684–691** Isolation and characterization of the aconitate hydratase 4 (*Aco4*) gene from soybean

Continued on inside back cover / Suite au verso



Front cover: Multi-year field experiments were conducted to evaluate herbicide programs for weed control in conventional soybean at Punjab Agricultural University, Ludhiana, India. Pendimethalin was applied pre-emergence followed by a post-emergence application of imazethapyr + imazamox/quizalofop-*p*-ethyl. For more information, see the paper by Yadav et al. on page 654 of this issue. Image by M. Bhullar.

Page couverture : Des expériences pluriannuelles sur le terrain ont été menées pour évaluer des programmes d'herbicides pour la lutte contre les mauvaises herbes dans les cultures de soja traditionnel à l'Université d'agriculture du Punjab à Ludhiana (Inde). De la pendiméthaline a été appliquée en prélevée, suivie d'une application en postlevée d'imazéthapyr + imazamox / quizalofop-*p*-éthyl. Pour en savoir plus, consulter l'article de Yadav et al. à la page 654 du présent numéro. Photo prise par M. Bhullar.

Other Characteristics

Seedling characteristics

Coleoptile colour: green; seedling growth habit: semi-erect; leaf blade pubescence: glabrous; leaf sheath pubescence: glabrous.

Plant characteristics at booting stage

Leaf colour: medium green; leaf waxiness: slight; flag leaf attitude: intermediate; flag leaf length: from short to medium; flag leaf width: medium.

Plant characteristics after heading

Stem colour at maturity: yellowish-white.

Panicle characteristics

Panicle shape: equilateral; panicle density: intermediate; panicle length: short to medium; panicle branch position: erect to horizontal; number of panicle whorls: 7; side branch angle (angle between rachis and dominate side branch): less than 30 degrees.

Rachilla characteristics (shortly after heading)

Rachilla length (second floret): medium; rachilla pubescence: glabrous.

Spikelet characteristics (from upper region of panicle)

Spikelet separation: semi-abscission; spikelet attitude: semi-nodding; glume colour at maturity: white to yellow.

Lemma and palea characteristics

Lemma length: medium (16–18 mm); lemma tip shape: medium pointed; lemma colour at maturity: cream; lemma awn presence: infrequent; lemma awn shape (if present): from straight to twisted.

Kernel characteristics

Seed length: medium (9.5–10.5 mm); seed width: medium (2.8–3.6 mm); seed colour: cream; kernel basal hair presence: absent.

Maintenance and Distribution of Pedigreed Seed

Breeder Seed of AAC Bullet is currently maintained at the Seed Increase Unit of AAFC in Indian Head, SK S0G 2K0, Canada. Certified seed of AAC Bullet is distributed by SeCan Association through W. Houde.

ON THE COVER: In contrast to the largely lifeless and monochromatic terrestrial environment of Antarctica, the sea floor teams with life and color. Replete with all manner of predators and prey, Antarctic benthic ecology is highly dependent on chemical mediation of interspecific interactions (Amsler et al. *J. Phycol.* **2014**, *50*, 1-10; McClintock et al. *Integ. Comp. Biol.* **2010**, *50*, 967-980). The carnivorous nudibranch *Doris kerguelenensis* at the center of this photograph defends itself with a suite of diterpene glycerides (Diyabalanage et al. *J. Nat. Prod.* **2010**, *73*, 416-421; Maschek et al. *Tetrahedron* **2012**, *68*, 9095-9104). The coupling of variability in diterpene diversity with genetic relatedness is believed to partly reflect the historical cycle of glaciation that has led to cryptic speciation (Wilson et al. *PLoS One* **2013**, *8*, e80277). Such chemical diversification is a boon to drug discovery, informing structure-activity studies and broadening the scope of bioactivity profiles. The labdane diterpene palmadorin M (**3**), for example, is the only one of 19 palmadorins that inhibits the Jak/STAT pathway in HEL cells (Maschek et al. *Tetrahedron* **2012**, *68*, 9095-9104), demonstrating the exquisite selectivity inherent in the evolution of chemical defenses. Other members of the palmadorin family include clerodanes (**1**, **2**) and halimanes (**4**), and *D. kerguelenensis* has been reported with a variety of related skeletons and degraded diterpenes (e.g., Cutignano et al. *Eur. J. Org. Chem.* **2011**, *27*, 5383-5389). Each of these individual natural products contributes to the success of its producing genotype and has the potential for selective biomedical applications. (This motif was provided by Dr. Bill J. Baker, University of South Florida, Tampa, FL, USA.)

Division de l'information et de la Documentation LE.B.A.

On the cover: Deletions in the coat protein of *Wheat streak mosaic virus* (WSMV) elicited acute chlorosis in multiple cereal hosts. Confocal microscope images of wheat leaves infected by green fluorescent protein–tagged WSMV harboring a deletion of coat protein amino acids 58 to 84 at 9 (top), 14 (middle), and 21 days postinoculation (dpi) (bottom). Chloroplasts in red are healthy, in blue are degraded, and in pink are in the process of degradation. Note the absence of round shaped red-colored chloroplasts in images at 14 and 21 dpi. For the article by Tatineni et al., see page 974.

Subscription price per year (2018): $1,079 U.S.A.; $1,179 elsewhere (includes expedited delivery outside the U.S.A.). Canadian subscribers add 5% GST/HST to the elsewhere price (Canadian GST #R129888129). Phytopathology

VOLUME 107, NUMBER 11 NOVEMBER 2017

REVIEW

1284 **Disease Suppressive Soils: New Insights from the Soil Microbiome** D. Schlatter, L. Kinkel, L. Thomashow, D. Weller, and T. Paulitz

BACTERIOLOGY

1298 **A Novel Phylogroup of *Pseudomonas cichorii* Identified Following an Unusual Disease Outbreak on Tomato** S. Timilsina, H. Adkison, A. L. Testen, E. A. Newberry, S. A. Miller, M. L. Paret, G. V. Minsavage, E. M. Goss, J. B. Jones, and G. E. Vallad

1305 **Further Evidence of Cucurbit Host Specificity among *Acidovorax citrulli* Groups Based on a Detached Melon Fruit Pathogenicity Assay** L. Yan, B. Hu, G. Chen, M. Zhao, and R. R. Walcott

1312 **Detection and Characterization of *Xanthomonas vasicola* pv. *vasculorum* (Cobb 1894) comb. nov. Causing Bacterial Leaf Streak of Corn in the United States** J. M. Lang, E. DuCharme, J. Ibarra Caballero, E. Luna, T. Hartman, M. Ortiz-Castro, K. Korus, J. Rascoe, T. A. Jackson-Ziems, K. Broders, and J. E. Leach

1322 **The Ribosomal Protein RplY Is Required for *Pectobacterium carotovorum* Virulence and Is Induced by *Zantedeschia elliotiana* Extract** H. Jiang, M. Jiang, L. Yang, P. Yao, L. Ma, C. Wang, H. Wang, G. Qian, B. Hu, and J. Fan

1331 **A Risk Assessment Model for Bacterial Leaf Spot of Pepper (*Capsicum annuum*), Caused by *Xanthomonas euvesicatoria*, Based on Concentrations of Macronutrients, Micronutrients, and Micronutrient Ratios** B. Dutta, D. B. Langston, X. Luo, S. Carlson, J. Kichler, and R. Gitaitis

1339 **Development of a Loop-Mediated Isothermal Amplification Assay for the Detection of *Dickeya* spp.** J. Yasuhara-Bell, G. Marrero, M. Arif, A. de Silva, and A. M. Alvarez

1346 **ClpXP-Dependent RpoS Degradation Enables Full Activation of Type III Secretion System, Amylovoran Production, and Motility in *Erwinia amylovora*** J. H. Lee and Y. Zhao

ECOLOGY AND EPIDEMIOLOGY

1353 **Differences in *Fusarium* Species in *brown midrib* Sorghum and in Air Populations in Production Fields** D. L. Funnell-Harris, E. D. Scully, S. E. Sattler, R. C. French, P. M. O'Neill, and J. F. Pedersen

1364 **Predicting Ascospore Release of *Monilinia vaccinii-corymbosi* of Blueberry with Machine Learning** D. O. C. Harteveld, M. R. Grant, J. W. Pscheidt, and T. L. Peever

GENETICS AND RESISTANCE

1372 **Quantitative Trait Loci for Slow-Rusting Resistance to Leaf Rust in Doubled-Haploid Wheat Population CI13227 × Lakin** Y. Lu, R. L. Bowden, G. Zhang, X. Xu, A. K. Fritz, and G. Bai

1381 **Genetic and Molecular Characterization of Leaf Rust Resistance in Two Durum Wheat Landraces** N. Qureshi, H. Bariana, J. A. Kolmer, H. Miah, and U. Bansal

MYCOLOGY

1388 **Spectral Patterns Reveal Early Resistance Reactions of Barley Against *Blumeria graminis* f. sp. *hordei*** M. T. Kuska, A. Brugger, S. Thomas, M. Wahabzada, K. Kersting, E.-C. Oerke, U. Steiner, and A.-K. Mahlein

1399 **The Emerging British *Verticillium longisporum* Population Consists of Aggressive *Brassica* Pathogens** J. R. L. Depotter, L. Rodriguez-Moreno, B. P. H. J. Thomma, and T. A. Wood

POPULATION BIOLOGY

1406 **Genetic Variability of *Phyllosticta ampelicida*, the Agent of Black Rot Disease of Grapevine** P. A. Rinaldi, D. Paffetti, C. Comparini, G. A. L. Broggini, C. Gessler, and L. Mugnai

1417 **Short-Term Host Selection Pressure Has Little Effect on the Evolution of a Monoclonal Population of *Verticillium dahliae* Race 1** K. D. Puri, S. Gurung, D. P. G. Short, Z. K. Atallah, G. Sandoya, R. M. Davis, R. J. Hayes, and K. V. Subbarao

TECHNIQUES

1426 **Automated Identification of Northern Leaf Blight-Infected Maize Plants from Field Imagery Using Deep Learning** C. DeChant, T. Wiesner-Hanks, S. Chen, E. L. Stewart, J. Yosinski, M. A. Gore, R. J. Nelson, and H. Lipson

VIROLOGY

1433 ***Potato virus Y* (PVY) Isolates from *Physalis peruviana* are Unable to Systemically Infect Potato or Pepper and Form a Distinct New Lineage Within the PVY^{C} Strain Group** K. J. Green, M. Chikh-Ali, R. T. Hamasaki, M. J. Melzer, and A. V. Karasev

1440 **Influence of *Groundnut bud necrosis virus* on the Life History Traits and Feeding Preference of Its Vector, *Thrips palmi*** G. Daimei, H. S. Raina, P. P. Devi, G. K. Saurav, P. Renukadevi, V. G. Malathi, C. Senthilraja, B. Mandal, and R. Rajagopal

Cover: *Symptoms of mosaic, crinkling, and leaf deformation induced by* Potato virus Y *on* Physalis peruviana. *(Green et al., page 1433)*

Phytopathology

VOLUME 107, NUMBER 12 DECEMBER 2017

REVIEW

1452 Signaling Mechanisms Underlying Resistance Responses: What Have We Learned, and How Is It Being Applied? A. Kachroo, P. Vincelli, and P. Kachroo

BIOLOGICAL CONTROL

1462 Evaluation of a Pomegranate Peel Extract as an Alternative Means to Control Olive Anthracnose S. Pangallo, M. G. L. D. Nicosia, G. E. Agosteo, A. Abdelfattah, F. V. Romeo, S. O. Cacciola, P. Rapisarda, and L. Schena

ECOLOGY AND EPIDEMIOLOGY

1468 Physiological Traits Determining Yield Tolerance of Wheat to Foliar Diseases F. van den Berg, N. D. Paveley, I. J. Bingham, and F. van den Bosch

ETIOLOGY

1479 Pathogenicity of Nectriaceous Fungi on Avocado in Australia L. E. Parkinson, R. G. Shivas, and E. K. Dann

GENETICS AND RESISTANCE

1486 Genome-Wide Association Mapping of Fusarium Head Blight Resistance in Spring Wheat Lines Developed in the Pacific Northwest and CIMMYT R. Wang, J. Chen, J. A. Anderson, J. Zhang, W. Zhao, J. Wheeler, N. Klassen, D. R. See, and Y. Dong

1496 Inheritance and Bulked Segregant Analysis of Leaf Rust and Stem Rust Resistance in Durum Wheat Genotypes M. Aoun, J. A. Kolmer, M. N. Rouse, S. Chao, W. D. Bulbula, E. M. Elias, and M. Acevedo

1507 The Point Mutation G461S in the *MfCYP51* Gene is Associated with Tebuconazole Resistance in *Monilinia fructicola* Populations in Brazil P. S. F. Lichtemberg, Y. Luo, R. G. Morales, J. M. Muehlmann-Fischer, T. J. Michailides, and L. L. May De Mio

1515 Identification of Clusters that Condition Resistance to Anthracnose in the Common Bean Differential Cultivars AB136 and MDRK A. Campa, N. Trabanco, and J. J. Ferreira

1522 Disease Resistance to Multiple Fungal and Oomycete Pathogens Evaluated Using a Recombinant Inbred Line Population in Pepper R. P. Naegele, L. L. Granke, J. Fry, T. A. Hill, H. Ashrafi, A. Van Deynze, and M. K. Hausbeck

MYCOLOGY

1532 Morphological and Genetic Analyses of the Invasive Forest Pathogen *Phytophthora austrocedri* Reveal that Two Clonal Lineages Colonized Britain and Argentina from a Common Ancestral Population B. Henricot, A. Pérez-Sierra, A. C. Armstrong, P. M. Sharp, and S. Green

POPULATION BIOLOGY

1541 Population Structure of *Pseudocercospora fijiensis* in Costa Rica Reveals Shared Haplotype Diversity with Southeast Asian Populations A. Saville, M. Charles, S. Chavan, M. Muñoz, L. Gómez-Alpizar, and J. B. Ristaino

TECHNIQUES

1549 Computer Vision for High-Throughput Quantitative Phenotyping: A Case Study of Grapevine Downy Mildew Sporulation and Leaf Trichomes K. Divilov, T. Wiesner-Hanks, P. Barba, L. Cadle-Davidson, and B. I. Reisch

1556 *Cluster*: A New Application for Spatial Analysis of Pixelated Data for Epiphytotics S. C. Nelson, I. Corcoja, and S. J. Pethybridge

VIROLOGY

1567 Insights Into the Etiology of Polerovirus-Induced Pepper Yellows Disease L. Lotos, A. Olmos, C. Orfanidou, K. Efthimiou, A. Avgelis, N. I. Katis, and V. I. Maliogka

Cover: *Banana leaf from field in Costa Rica on Dole plantation infected with* Pseudocercosporella fijiensis. *(Saville et al., page 1541)*

FEATURE

1836 **A Beacon for Applied Plant Pathology: The Origins of *Plant Disease*.** *P. D. Peterson, S. C. Nelson, and K.-B. G. Scholthof*

RESEARCH

1843 **Late Leaf Spot Severity and Yield of New Peanut Breeding Lines and Cultivars Grown Without Fungicides.** *B. S. Jordan, A. K. Culbreath, T. B. Brenneman, R. C. Kemerait Jr., and W. D. Branch*

1851 **Pathogenicity and Virulence of Soilborne Oomycetes on *Phaseolus vulgaris*.** *D. R. Rossman, A. Rojas, J. L. Jacobs, C. Mukankusi, J. D. Kelly, and M. I. Chilvers*

1860 **Seed Rot and Damping-off of Alfalfa in Minnesota Caused by *Pythium* and *Fusarium* Species.** *L. E. Berg, S. S. Miller, M. R. Dornbusch, and D. A. Samac*

1868 **Evaluation of Quinone Outside and Succinate Dehydrogenase Inhibitors for Effectiveness Against Eastern Filbert Blight of Hazelnut.** *J. W. Pscheidt, S. Heckert, and S. A. Cluskey*

1874 **Mycoflora Associated With Pyrethrum Seed and the Integration of Seed Steam Treatment Into Foliar Disease Management Strategies.** *J. B. Scott, D. H. Gent, T. L. Pearce, S. J. Pethybridge, S. J. Pilkington, and F. S. Hay*

1885 **Phenotype and Cellular Response of Wheat Lines Carrying *Cre* Genes to *Heterodera avenae* Pathotype Ha91.** *J. Cui, H. Peng, W. Huang, S. Liu, D. Wu, L. Kong, W. He, and D. Peng*

1895 **Disinfectant Treatments That Reduce Transmission of *Stagonosporopsis citrulli* During Cucurbit Grafting.** *A. P. Keinath and V. B. DuBose*

1903 **Associations Between *Armillaria* Species and Host Plants in U.K. Gardens.** *J. Drakulic, C. Gorton, A. Perez-Sierra, G. Clover, and L. Beal*

1910 **Meta-Analysis of a Web-Based Disease Forecast System for Control of Anthracnose and Botrytis Fruit Rots of Strawberry in Southeastern United States.** *L. G. Cordova, L. V. Madden, A. Amiri, G. Schnabel, and N. A. Peres*

1918 **Suppression of Soilborne Diseases of Soybean With Cover Crops.** *L. Wen, S. Lee-Marzano, L. M. Ortiz-Ribbing, J. Gruver, G. L. Hartman, and D. M. Eastburn*

1929 **Characterization of Fungi Associated With Wood Decay of Tree Species and Grapevine in Greece.** *E. A. Markakis, N. Kavroulakis, S. Ntougias, G. C. Koubouris, C. K. Sergentani, and E. K. Ligoxigakis*

1941 **Phenotyping Sunflower Genetic Resources for Sclerotinia Head Rot Response: Assessing Variability for Disease Resistance Breeding.** *C. V. Filippi, J. E. Zubrzycki, J. A. Di Rienzo, F. Quiroz, C. M. Fusari, D. Alvarez, C. A. Maringolo, D. Cordes, A. Escande, H. E. Hopp, R. A. Heinz, V. V. Lia, and N. B. Paniego*

DISEASE NOTES

Diseases Caused by Bacteria and Phytoplasmas

1949 **First Report of Strawberry Bacterial Angular Leaf Spot Caused by *Xanthomonas fragariae* in Tianjin, China.** *J. Wang, H. L. Wei, R. K. Chang, H. Q. Liu, and Y. H. Wang*

1949 **First Report of Pecan Bacterial Leaf Scorch Caused by *Xylella fastidiosa* in Pecan (*Carya illinoinensis*) in Arizona, New Mexico, California, and Texas.** *A. E. Hilton, Y.-K. Jo, K. Cervantes, R. A. Stamler, J. J. Randall, J. M. French, R. J. Heerema, N. P. Goldberg, J. Sherman, X. Wang, and L. J. Grauke*

1949 **First Report of '*Candidatus* Phytoplasma asteris' (subgroup 16SrI-X) Associated with Bottle Gourd Virescence and Phyllody Disease in India.** *S. Tripathi, V. Thorat, R. Verma, Y. Shouche, and A. Yadav*

1950 **First Report of Soybean (*Glycine max*) Disease Caused by *Pseudomonas aeruginosa* in Cuba.** *O. Plasencia-Márquez, M. Corzo, Y. Martínez-Zubiaur, D. Rivero, G. Devescovi, and V. Venturi*

1950 **First Report of *Burkholderia cenocepacia* Causing Sour Skin of Onion (*Allium cepa*) in Brazil.** *W. J. Oliveira, W. A. Silva, A. M. F. Silva, J. A. Candeia, E. B. Souza, R. L. R. Mariano, and M. A. S. Gama*

Diseases Caused by Fungi and Fungus-Like Organisms

1951 **First Report of Alternaria Black Spot caused by *Alternaria alternata* on *Brassica carinata* in South Dakota.** *M. Dunbar, A. Adhikari, B. Kontz, A. Varenhorst, T. Nleya, E. Byamukama, and F. Mathew*

1951 **First Report of *Curvularia lunata* Causing Leaf Blight on Mulberry (*Morus* sp.) in Thailand.** *B. Bussaban, P. Kodchasee, S. Apinyanuwat, C. Kosawang, and N. Jonglaekha*

1952 **First Report of Leaf Blight on Lavender (*Lavandula angustifolia* Mill. subsp. *angustifolia*) Caused by *Phoma multirostrata* in Italy.** *A. P. Lanteri, E. Guido, A. Minuto, and F. Tinivella*

1952 **First Report of Leaf Blight caused by *Setosphaeria turcica* on Sweet Sorghum (*Sorghum bicolor*) in China.** *L. Tong, Z. Liu, J. Cui, J. Hu, and R. Y. Zhang*

1952 ***Neopestalotiopsis clavispora* Causing Leaf Spot on *Phedimus aizoon* var. *latifolius*, a New Disease in China.** *L. N. Yang, X. Y. Miao, Q. R. Bai, M. Q. Wang, M. L. Gu, and T. C. Zhao*

1953 **First Report of Sclerotinia Stem Rot Caused by *Sclerotinia sclerotiorum* on Chinese chives in Korea.** *I. Y. Choi, J. Kim, W. H. Lee, S. E. Cho, and H. D. Shin*

1953 **First Report of Powdery Mildew Caused by *Erysiphe quercicola* on *Quercus mongolica* in China.** *P.-L. Qiu, S.-Y. Liu, and Y. Li*

1953 **First Report of Cercospora Blight of *Asparagus officinalis* Caused by *Cercospora asparagi* in New York.** *F. S. Hay, E. Maloney, N. Vaghefi, R. G. Shivas, and S. J. Pethybridge*

1954 **First Report of *Fusarium falciforme* (FSSC 3 + 4) Causing Root Rot in Lima Bean (*Phaseolus lunatus* L.) in Brazil.** *E. S. Sousa, M. P. Melo, J. M. Mota, E. M. J. Sousa, J. E. A. Beserra Jr, and K. S. Matos*

1954 **First Report of Powdery Mildew Caused by *Blumeria graminis* on *Avena sativa* in China.** *L. H. Xue and C. J. Li*

1955 **Occurrence of *Cylindrocladium pauciramosum* Causing Leaf Spot on *Strelitzia reginae* in Southern Brazil.** *P. R. Meneses, C. Belle, V. L. Moreira-Nuñez, V. Gaviria-Hernández, R. Moccellin, D. R. de Barros, and C. R. J. de Farias*

1955 **First Report of Curvularia Blight on Sunflower Caused by *Curvularia aeria* in Mexico.** *M. G. Velázquez-del Valle, B. Poudel, and S. Zhang*

1955 **First Report of Fusarium Head Blight Caused by *Fusarium cerealis* in Barley in New York.** *J. A. Cummings, K. Myers, A. F. Blachez, and G. C. Bergstrom*

1956 **First Report of Fusarium Root Rot of *Solanum melongena* Caused by *Fusarium solani* in China.** *B. J. Li, P. L. Li, J. Li, A. L. Chai, Y. X. Shi, and X. W. Xie*

1956 **First Report of *Myrothecium roridum* Causing Leaf Spot on *Petunia hybrida* in China.** *H.-Y. Ben, H.-Y. Qu, L.-X. Chen, J.-M. Zhang, J. Ma, X.-Y. Zhang, Y.-J. Zhao, and D.-Y. Huang*

1957 **First Report of Rust Caused by *Coleosporium asterum* on *Aster spathulifolius* in Korea.** *B. S. Kim, I. Y. Choi, M. J. Park, S. E. Cho, and H. D. Shin*

Diseases Caused by Nematodes

1957 **First Report of the Soybean Cyst Nematode, *Heterodera glycines*, in New York.** *X. Wang, G. C. Bergstrom, S. Chen, D. M. Thurston, J. A. Cummings, Z. A. Handoo, M. N. Hult, and A. M. Skantar*

Diseases Caused by Oomycetes

1958 **First Report of Downy Mildew Caused by *Plasmopara viticola* on *Vitis ficifolia* var. *sinuata* in Korea.** *Y. J. Choi, S. E Cho, and H. D. Shin*

Diseases Caused by Viruses

1958 **First Report of *Grapevine Pinot gris virus* Infecting Grapevine in Pakistan.** *S. Rasool, S. Naz, A. Rowhani, D. A. Golino, N. M. Westrick, K. D. Farrar, and M. Al Rwahnih*

1958 **First Report of Corky Ringspot in Potatoes Caused by *Tobacco rattle virus* in Jiangsu Province, China.** *F. Zhu, Y. K. Zhou, K. Qian, Y. P. Che, Y. M. Ma, Z. Liu, and S. C. Cheng*

1959 **First Report of *Tomato severe rugose virus*, a Tomato-Infecting Begomovirus, in Soybean Plants in Brazil.** *M. A. Macedo, S. S. Barreto, T. M. Costa, G. A. Rocha, E. C. Dianese, R. L. Gilbertson, and A. K. Inoue-Nagata*

1959 **First Report of *Youcai mosaic virus* in *Raphanus raphanistrum* subsp. *sativus* in Korea.** *S.-K. Choi, S.-H. Park, B.-W. Jeon, S.-W. Jang, and J.-Y. Yoon*

1960 **First Report of Mild Mosaic in Ground Orchid, *Phaius tankervilleae*, in India Associated with Infection of *Calanthe mild mosaic virus*.** *R. P. Pant, R. Kapoor, S. Kumar, N. Srivastava, M. Kumar, and V. K. Baranwal*

1960 **First Report of Hippeastrum chlorotic ringspot virus Infecting *Zephyranthes candida* in China.** *B. W. Wu and Y. T. Liu*

1961 **Erratum**

SPECIAL REPORT

1968 **Physiologic Specialization of *Puccinia triticina* on Wheat in the United States in 2015.** *J. A. Kolmer and M. E. Hughes*

RESEARCH

1974 **Mapping of Quantitative Trait Loci for Leaf Rust Resistance in the Wheat Population Ning7840 × Clark.** *C. Li, Z. Wang, C. Li, R. Bowden, G. Bai, C. Li, C. Li, Z. Su, and B. F. Carver*

1980 **Molecular Characterization and Distribution of Two Strains of *Dasheen mosaic virus* on Taro in Hawaii.** *Y. Wang, B. Wu, W. B. Borth, I. Hamim, J. C. Green, M. J. Melzer, and J. S. Hu*

1990 **Evaluation of Commercial Soybean Cultivars for Reaction to Phomopsis Seed Decay.** *S. Li, G. Sciumbato, J. Rupe, G. Shannon, P. Chen, and D. Boykin*

1998 **Effects of Row Spacing and Nitrogen Rate on Wheat Grain Yield and Profitability as Influenced by Diseases.** *J. D. Salgado, L. E. Lindsey, and P. A. Paul*

2012 **Methods for the Quantification of Resistance of Apple Genotypes to European Fruit Tree Canker Caused by *Neonectria ditissima*.** *M. Wenneker, P. W. Goedhart, P. van der Steeg, W. E. van de Weg, and H. J. Schouten*

2020 **Genetic Diversity of *Stenocarpella maydis* in the Major Corn Production Areas of the United States.** *M. P. Romero Luna, M. C. Aime, M. I. Chilvers, and K. A. Wise*

2027 **Effects of Wound Size, Amount of Sap, and Number of Blighted Nuts on Infection of Pistachio Organs by *Neofusicoccum mediterraneum*.** *J. Moral, N. Ahimera, D. G. Felts, D. P. Morgan, and T. J. Michailides*

2034 **Morphological, Pathogenic, and Molecular Characterization of *Colletotrichum acutatum* Isolates Causing Almond Anthracnose in Spain.** *A. López-Moral, M. C. Raya-Ortega, C. Agustí-Brisach, L. F. Roca, M. Lovera, F. Luque, O. Arquero, and A. Trapero*

2046 **Unveiling of Dominant Fungal Pathogens Associated With Rusty Root Rot of *Panax notoginseng* Based on Multiple Methods.** *C. Mi, R. Yang, J. Rao, S. Yang, F. Wei, O. Li, and X. Hu*

2053 **Cucurbit chlorotic yellows virus: Insights Into Its Natural Host Range, Genetic Variability, and Transmission Parameters.** *C. G. Orfanidou, A. Baltzi, N. A. Dimou, N. I. Katis, and V. I. Maliogka*

2059 **Impacts of Fungal Stalk Rot Pathogens on Physicochemical Properties of Sorghum Grain.** *Y. M. A. Y. Bandara, T. T. Tesso, S. R. Bean, F. E. Dowell, and C. R. Little*

2066 ***Fusarium oxysporum* f. sp. *mori*, a New Forma Specialis Causing Fusarium Wilt of Blackberry.** *A. M. Pastrana, S. C. Kirkpatrick, M. Kong, J. C. Broome, and T. R. Gordon*

2073 **Direct Root Penetration and Rhizome Vascular Colonization by *Fusarium oxysporum* f. sp. *cubense* are the Key Steps in the Successful Infection of Brazil Cavendish.** *C. Li, J. Yang, W. Li, J. Sun, and M. Peng*

2079 **Development and Validation of KASP-SNP Markers for QTL Underlying Resistance to Stripe Rust in Common Wheat Cultivar P10057.** *J. Wu, Q. Wang, Z. Kang, S. Liu, H. Li, J. Mu, M. Dai, D. Han, Q. Zeng, and X. Chen*

2088 **Epidemiology and Genetic Diversity of Grapevine Leafroll-Associated Viruses in British Columbia.** *S. Poojari, J. Boulé, N. DeLury, D. T. Lowery, M. Rott, A.-M. Schmidt, and J. R. Úrbez-Torres*

2098 **Diversity of Sweepoviruses Infecting Sweet Potato in China.** *Q. Liu, Y. Wang, Z. Zhang, H. Lv, Q. Qiao, Y. Qin, D. Zhang, Y. Tian, S. Wang, and J. Li*

2104 **Lack of Evidence of Vertical Transmission of '*Candidatus* Liberibacter solanacearum' by Carrot Seeds Suggests That Seed is not a Major Transmission Pathway.** *M. Loiseau, I. Renaudin, P. Cousseau-Suhard, P.-M. Lucas, A. Forveille, and P. Gentit*

2110 **Construction of Full-length Infectious cDNA Clones of *Apple chlorotic leaf spot virus* and Their Agroinoculation to Woody Plants by a Novel Method of Vacuum Infiltration.** *L. Zhang and W. Jelkmann*

2116 **Assessment of *Fusarium pseudograminearum* and *F. culmorum* Biomass in Seedlings of Potential Host Cereal Species.** *N. L. Knight and M. W. Sutherland*

2123 ***Coniella vitis* sp. nov. Is the Common Pathogen of White Rot in Chinese Vineyards.** *K. W. T. Chethana, Y. Zhou, W. Zhang, M. Liu, Q. K. Xing, X. H. Li, J. Y. Yan, K. W. T. Chethana, and K. D. Hyde*

2137 **Effect of Soybean Cyst Nematode Resistance Source and Seed Treatment on Population Densities of *Heterodera glycines*, Sudden Death Syndrome, and Yield of Soybean.** *Y. R. Kandel, K. A. Wise, C. A. Bradley, M. I. Chilvers, A. M. Byrne, A. U. Tenuta, J. Faghihi, S. N. Wiggs, and D. S. Mueller*

DISEASE NOTES

Diseases Caused by Bacteria and Phytoplasmas

2144 **First Report of Soft Rot in Kale Caused by *Pectobacterium carotovorum* subsp. *brasiliensis* in Brazil.** *M. F. Queiroz, G. M. R. Albuquerque, M. A. S. Gama, R. L. R. Mariano, A. J. G. Moraes, E. B. Souza, J. B. Souza, C. D. Da Paz, and A. R. Peixoto*

2144 **First Report of 16Sr II ('*Candidatus* Phytoplasma aurantifolia') Subgroup-D Phytoplasma Associated with Alfalfa in Sudan.** *M. N. Tahir, C. W. Holland, D. A. Samac, and D. Mollov*

2144 **First Report of Blackleg and Tuber Soft Rot of Potato Caused by *Pectobacterium parmentieri* in Minnesota and North Dakota.** *R. R. McNally, R. D. Curland, B. T. Webster, A. P. Robinson, and C. A. Ishimaru*

2145 **First Report of a New Citrus Decline Disease (CDD) in Association with Double and Single Infection by '*Candidatus* Liberibacter asiaticus' and '*Candidatus* Phytoplasma aurantifolia' Related Strains in Iran.** *H. Alizadeh, F. Quaglino, M. Azadvar, S. Kumar, A. Alizadeh, F. Bolboli, P. Casati, and P. A. Bianco*

2415 **First Report of *Pectobacterium atrosepticum*, Causing Bacterial Soft Rot on Calla Lily in Serbia.** *T. Popović, A. Jelušić, P. Milovanović, S. Janjatović, M. Budnar, I. Dimkić, and S. Stanković*

Diseases Caused by Fungi and Fungus-Like Organisms

2146 **First Report of *Dactylonectria pauciseptata* Associated with Black Foot of Grapevine and Root Rot of Plum in Bulgaria.** *N. Piperkova, A. Cabral, M. Mohamedova, S. Milusheva, and H. Oliveira*

2146 **First Report of Brown Spot on Jerusalem Artichoke (*Helianthus tuberosus*) Caused by *Bipolaris zeae* in China.** *Y.-Q. Zhao, D. M. Zhang, L.-J. Zhang, X. Y. Yu, H. R. Yu, K. Shi, and K. Gao*

2146 **First Report of *Physarella oblonga* on *Lentinula edodes* in China.** *Y. S. Li, B. Zhang, S. C. Jiang, T. Hsiang, Y. Li, and X. L. Wang*

2147 **First Report of *Phomopsis longicolla* Causing Stem Necrosis on Soybean in Arkansas.** *A. C. Tolbert and T. N. Spurlock*

2147 **First Report of *Alternaria alternata* Causing Brown Leaf Spot Disease on Panicle Hydrangea (*Hydrangea paniculata*) in China.** *Z.-H. Liu, B. Song, Y.-P. Fu, and Y. Li*

2148 **First Report of a Serious Cladode Disease of *Opuntia ficus-indica* (Prickly Pear) in South Africa caused by *Bisifusarium lunatum*.** *M. Gryzenhout, H. J. Fouche, and W. J. Swart*

2148 **First Report of Stem Canker Caused by *Fusarium solani* on *Tectona grandis* in China.** *S. P. Huang, Z. L. Li, J. G. Wei, J. Y. Mo, Q. L. Li, T. X. Guo, J. T. Luo, X. H. Yang, X. F. Tan, and X. B. Yang*

2148 **Crown and Root Rot Caused by *Rhizoctonia solani* on Cilantro in California.** *S. T. Koike, O. Daugovish, F. N. Martin, and M. L. Ramon*

2149 **Occurrence of Severe Outbreak of Calyx-End Rot Associated with *Botrytis cinerea* in *Malus* × *domestica* cv. Cripps Pink During Harvest in the Maule Region, Chile.** *E. E. Ferrada, M. Lolas, C. Pacheco, and G. A. Díaz*

2149 **First Report of *Penicillium polonicum* Causing Blue Mold on Stored *Polygonatum cyrtonema* in China.** *L. S. Chen, Y. J. Liu, S. W. Xu, Y. L. Chen, M. J. Chen, and L. J. Zhou*

2150 **First Report of *Colletotrichum gloeosporioides* Causing Leaf Spots on *Smilax sieboldii* in China.** *J. N. Zhang, L. M. Song, W. X. Liang, and D. L. Li*

2150 **First Report of *Colletotrichum aenigma* Causing Anthracnose on *Sedum kamtchaticum* in Korea.** *H.-W. Choi, Y. K. Lee, and S. K. Hong*

2150 **First Report of *Colletotrichum siamense* Causing Anthracnose on *Iris tectorum* in Sichuan Province of China.** *D. Liu, P. L. Li, J. Li, X. Luo, G. S. Gong, M. Zhang, J. M. Yan, Y. Huang, and Q. Wang*

2151 **First Report of Anthracnose Caused by *Colletotrichum gloeosporioides* on Kiwifruit (*Actinidia chinensis*) in China.** *L. Li, H. Pan, M. Y. Chen, S. J. Zhang, and C. H. Zhong*

2151 **First Report of *Alternaria alternata* as the Causal Agent of Alternaria Bud and Blossom Blight of Olives.** *C. S. Lagogianni, E. C. Tjamos, P. P. Antoniou, and D. I. Tsitsigiannis*

2152 **First Report of *Heterobasidion occidentale* on *Sequoia sempervirens* in Northern California.** *M. Garbelotto, M. Friedman, W. Bedell, and T. Henkel*

2152 **First Report of *Alternaria alternata* Causing Alternaria Leaf and Stem Spot on *Rhodiola rosea* in China.** *T. Liu, Z. Liu, J. Cui, and J. Hu*

Diseases Caused by Nematodes

2152 **First Report of Root-knot Nematode, *Meloidogyne graminicola*, on Rice in Zhejiang, Eastern China.** *Z. L. Tian, E. M. Barsalote, X. L. Li, R. H. Cai, and J. W. Zheng*

2153 **First Report of *Meloidogyne graminicola* on Rice (*Oryza sativa*) in Hunan Province, China.** *Z. Q. Song, D. Y. Zhang, Y. Liu, and F. X. Cheng*

Diseases Caused by Viruses

2153 **First Report of *Banana bunchy top virus* in *Heliconia* spp. on Hawaii.** *I. Hamim, J. C. Green, W. B. Borth, M. J. Melzer, Y. N. Wang, and J. S. Hu*

2154 **First Report of *Cucumber mosaic virus* Infecting *Ricinus communis* in Iran.** *H.-A. Mirhosseini, S. Nasrollah-Nejad, V. Babaeizad, and H. Rahimian*

2154 **First report of spinach (*Spinacia oleracea*) wilt caused by cucumber mosaic virus (CMV) in Brazil.** *V. A. Yuki, T. Mituti, J. A. M. Rezende, R. B. Salarori, E. W. Kitajima, and J. P. Kitajima*

2154 **First Report of *Strawberry pallidosis-associated virus* on Strawberry in China.** *X. Ding, D. Chen, A. Wang, J. Zhang, and Z. Wu*

2155 **First Report of Grapevine hammerhead viroid-like RNA Infecting Grapevine (*Vitis vinifera*) in France.** *T. Candresse, C. Faure, S. Theil, A. S. Spilmont, and A. Marais*

2155 **Detection of the *Rice stripe necrosis virus* Causing Rice Crinkle Disease and its Vector *Polymyxa graminis* f. sp. *colombiana* in Mali.** *A. Decroës, I. Bagayoko, M. Mahillon, H. Verhaegen, C. Liénard, A. Legrève, and C. Bragard*

2155 **First Association of *Pedilanthus leaf curl virus*, *Papaya leaf curl virus*, *Cotton leaf curl Kokhran virus*, and *Papaya leaf curl betasatellite* with Symptomatic Chilli Pepper in Pakistan.** *S. Yasmin, N. I. Raja, S. Hameed, and J. K. Brown*

2156 **Distinct Isolates of *Grapevine rupestris vein feathering virus* Detected in *Vitis vinifera* in New Zealand.** *A. G. Blouin and R. M. MacDiarmid*

2156 **First Report of Maize yellow mosaic virus Infecting Maize in Brazil.** *M. C. Gonçalves, M. Godinho, D. M. T. Alves-Freitas, A. Varsani, and S. G. Ribeiro*

COVER IMAGES

Symptoms of grape white rot on *Vitis vinifera* 'Summer Black' (courtesy X. H. Li, see page 2123); cladode rot on *Opuntia ficus-indica* associated with *Bisifusarium lunatum* (courtesy M. Gryzenhout, see page 2148); rice roots with symptoms of *Meloidogyne graminicola* infection (courtesy F. X. Cheng, see page 2153).

Contents

233 **Soil and Aggregate-Associated Carbon in a Young Loblolly Pine Plantation: Influence of Bioenergy Intercropping**
Kevan J. Minick • Zakiya H. Leggett • Eric B. Sucre • Thomas R. Fox
Brian D. Strahm

241 **Nutrient Leaching and Retention in Riparian Soils as Influenced by Rice Husk Biochar Addition**
Xiaoli Bu • Jianhui Xue • Chengxiao Zhao • Yongbo Wu • Fengyan Han

248 **Effect of Biochar, Green Compost, and Vermicompost on the Quality of a Calcareous Soil: A 1-Year Laboratory Experiment**
Roberto Cardelli • Michelangelo Becagli • Fausto Marchini • Alessandro Saviozzi

256 **Transport of Cadmium and Phosphate in Soils: Miscible Displacement Experiments and Nonlinear Modeling**
H. Magdi Selim • Lewis A. Gaston

Photo courtesy of Dr. Zakiya Leggett showing an image of lobolly pine trees intercropped with switchgrass for simultaneous wood and bioenergy production in the coastal plain of southeastern United States. Investigators studied the effect of this new land-use on soil carbon and nutrient cycling, soil microbial processes, water quality, above- and below-ground plant biomass production, and biodiversity. Work reported in pages 233-240.
